

# THE FIGHT AGAINST PLASTIC

We are Holy Trinity School Eco Club and School Council.

We are very concerned about the environment and we are sure that you are too!

If you want to get involved then read on...

Here are a few steps to help join in:

1. When going shopping, always take your own bag with you to be eco-friendly!
2. Instead of throwing your empty plastic containers in the bin, use them for junk modelling or donate them to a local school for them to use.
3. Remember to always compost your food.
4. Try walk more than you drive.

One of the most recognisable eco phrases are the 3 R's- Reduce, Reuse, Recycle. But this has had an additional R. It is Refuse! Recycle has been replaced, For example, Refuse could be if you are at the shops buying bananas – which would you buy - a banana wrapped in plastic or a banana on its own? A banana on its own would be refusing to the banana wrapped in plastic which would help our fight against plastic.

Not only will “bio-degradable plastic” be on the planet for millions of years but animals will end up dying because of plastic!

By Anna, Rosa, Ruth (and special thanks to Kiran) Y4 Eco club.
