

## **Rules**

- take turns to throw the dice and put the dots into a box
- you can put your dots anywhere but you can't have more than six dots in any one box
- you have to put all your dots in one box
- you win if you finish the line, row or diagonal of complete boxes
- if you can't go you miss a turn.

When everyone has played a few times, you can change the game:

- by making the total different (10, 12, 15, 20)
- by giving different dice (with only even numbers, only odds, dice to 10 etc)
